

Company :	Urjanet																																																																																																																																																																																																																																																																																																											
Company Name :	Urjanet																																																																																																																																																																																																																																																																																																											
Nature Of Business :	Startup																																																																																																																																																																																																																																																																																																											
Designation :	Software Engineer																																																																																																																																																																																																																																																																																																											
Tentative Job Location :	Chennai																																																																																																																																																																																																																																																																																																											
<p>The role includes working as part of the core engineering group of the organization and directly responsible for improving, enhancing and transforming the Urjanet platform that processes millions of transactions each month to provide its customers with energy and utility data as a service (DaaS). Urjanet strongly believes the solid engineers are the backbone of organization and is in the pursuit of building a world class engineering team that will lead the it to sound success. We are a leader in utility data aggregation and management services for energy and sustainability reporting, alternative credit scoring, identity verification, solar sales etc.</p> <p>We are looking for a Full stack developer (FSD) who is proficient in both backend and frontend technologies. You will be required to work on our core engine besides next gen architecture that is built on solid principles of microservices. Our engine’s performance improvements and our product roadmap to take newer functionalities to the market will be dependent on you. We require you to be detailed oriented in your analysis and be independent in your work. We are looking for a proactive individual with very good communication skills.</p>
