

Company : Oski Technology
Company Name : Oski Technology, Inc.
Nature Of Business : Core (Technical)
Designation : Formal Verification Engineer
Tentative Job Location : Gurugram

Oski Technology specializes in Formal Verification of semiconductor designs. Oski’s unique formal verification services deliver peak sign-off confidence earlier in the development cycle by diving deep into design behavior to track down the most complex corner-case bugs.

Our approach exhaustively proves the absence of bugs and brings a higher level of productivity to our clients, as compared with traditional simulation and formal verification approaches.

Description :
Since 2005, Oski has focused on developing comprehensive formal verification methodologies to identify and sign-off high-risk blocks, achieve system-level architecture sign-off, and quickly resolve post-silicon bugs.

Oski has built the largest team of formal verification experts in the world. Our founder and Chief Oski, Vigyan Singhal, did his PhD thesis at UC Berkeley in formal methods of verification. Vigyan later developed Cadence’s first-generation formal verification tool, and was the founder of Jasper Design Automation, which was later acquired by Cadence.

The company is headquartered in San Jose, CA with a design center in Gurugram, India.
