<b>Company Name :</b>	<b>SKY GOAL INNOVA TECHONOLOGIES PVT LTD</b>
<b>Nature Of Business :</b>	<b>Education tech</b>
<b>Designation :</b>	<b>Full stack Developer</b>
<b>Tentative Job Location :</b>	<b>Work from Home</b>

## **Full Stack Developer Job Description**

### **Our Culture**

**We embrace the start-up vibe of being agile, with open communication and teamwork. We've created a work environment where you'll learn, challenge the status quo, let your creative juices flow, and have your voice heard. In short, we move fast, we learn from our mistakes and we enjoy hanging out. Come join us!**

### **About Sky Goal®**

**Sky Goal® is a technology innovation organization focused on the design and development of Ed-tech solutions. At Sky Goal®, we recognize the rush to reach of education concepts and all our efforts are focused on enabling that future, in the fastest and effective way possible.**

**The Sky Goal® team of engineers, with vast expertise in application development, Web Apps, backend development is dedicated to the development of best-in-class applications and smooth User Experience that stretch from the pocket (electronic devices) to the Desktop (PC).**

### **Where you can make an impact:**

**Design and lead the development of high-performance, scalable, and delightful consumer-first experiences that improve the lives of millions of users.**

**Build out the service architecture that interfaces the front-end stack to seamlessly talk to our identity services, data layer, or APIs.**

### **You are:**

**Customer-focused: You are passionate about creating web and mobile applications products that improve the lives of millions of users and building delightful user experiences.**

**Communication and collaboration: You are able to work effectively with others. You will be working closely with other developers, designers, product managers, user research team, and customer groups to build product features and high-quality products.**

**Expertise in JavaScript framework like Angular, React, VueJS, or equivalent.**

**experience working with Angular, Node, React, or similar web frameworks**

**Experience with CSS3 and Less/Sass (ability to write mixins, partials, functions, etc) and usage in large scale applications**

**Proven ability to share and collaborate with peers both verbally and in writing Experience in Single Page Application architecture**

**Proficient knowledge of Git and NPM Experience with testing frameworks capable of learning new programming languages**

**You have a track record of developing software with builds and deployment**

**Leadership: You have demonstrated feature development ownership, can lead by example, and enjoy mentoring and inspiring other engineers.**

**High-energy, company first, positive attitude: Must be motivated to work hard in a fast-paced environment.**

### **Your experience:**

**experience of building consumer web applications or services.**

**Must have experience in real-time web and mobile dashboard.**

**Description : Advanced programming skills developing using client-side JavaScript and HTML/CSS.**

**Experience in building highly scalable web services and building/using RESTful APIs**

**Must have experience with Node.js, Express.js, and React/Flux/Redux a plus.**

**Knowledge of any one of Cloud Platform AWS, Azure, and GCP**

**Strong understanding, building, and debugging of scalable, high-performance web applications built with reusability and componentization in mind.**

**Familiarity with Single Page Application Frameworks (React, Angular, Backbone), responsive design, and MVC design patterns.**

**Bachelor's Degree in Engineering, Computer Science, or a related field preferred. You should be able to demonstrate a superior understanding of CS fundamentals.**

**Good time-management skills**

**A portfolio of projects (GitHub, papers, etc.)**

**For this role, we're looking for...**

Experience building or working with APIs. It turns out that there are a lot harder to design and change than they are to consume. You have Strong Opinions about what good API design looks like, informed by real-world experience.

Experience working with modern web technologies at scale. It doesn't necessarily matter which ones specifically if you know how to use them well. But, for what it's worth, we like Node.js, Elixir, Angular, React, PostgreSQL, Elasticsearch, and most of the good parts of AWS.

The Ideal Candidate will be

Smart. You're a top-performing teammate. Curious. You ask why, you explore, you're not afraid to introduce and defend a crazy idea.

Working with agile methodology

Strong communication skills to collaborate with various stakeholders

Ability to discuss and explain design options

Be energized at the prospect of working on software that improves people's lives

Experience in a Start-up environment.

Should have experience working in an Agile (Scrum) environment.

Ability to discuss and explain design options

Detail-oriented, Critical thinker, and Team spirit

Be smart about choosing between fast and right

Problem solver and customer-centred

Good time-management skills

Note: During Training/Probationary period the candidates are being tested on their skill set and work environment based out of company's requirement. Candidates who clears the tasks assigned to specific role are being analysed and given offer letter once training completes.
