IT

Software Engineer

Noida

We are looking for young creative technologists who are proud of their creations be it code, design, architecture or solution. Professionals who wish to be part of our mission and help us build and evolve world class software products. The role is in the Product Engineering team. Following are some expectations from the role:

Project description in terms of broad phases:

The engagement will be directly with the **Product R&D team**.

All projects will be related to our product offerings and will involve development of extensions, APIs, Frameworks, Toolkits and other re-usable components to be used in one of our Product Suites mentioned above.

These projects will be developed based on **Java, J2EE Technologies** using various frameworks like **Spring, JPA/Hibernate, Bootstrap 3.0 JQuery** etc. Some of the projects will provide exposure to latest technologies like **Machine learning, Artificial intelligence, IOT, Chatbots, Neural networks** etc.

Programming skills in Java and knowledge of OOPS

Strong analytical and problem solving capabilities

Ability to research new technologies and methods

Passionate about designing and coding high performing and highly scalable software solutions for Banking & Financial Services Industry (BFSI)
