Udaan  
udaan  
  
  
Engineer  
  
Bangalore

About the Role:

- You will be a part of the technology team at Udaan, which essentially deals with the ecommerce platform and the tech stack of the organization. Tech Stack at Udaan: o Kotlin/Java for backend o Javascript for the frontend o React Native for Android & iOS app o ReactJS with Redux for website o Kubernetes + Docker o Azure cloud services

Description :

• Key Requirements:  
  
o Good Software engineering skills: It could be in any language or technologies of your choice, but you are expected you to know them deeply. In addition, you are to be a quick learner in any new technology that you get exposed to. o Product Thinking & Problem Solving: We need our engineers to deeply understand customer needs, business use-cases, and connect that back to the products we are working. o Ownership: we believe in end-to-end product ownership. You will be responsible for all aspects of your product from figuring out to what features to build to ensuring uptime and a smooth customer experience.
