

Company :
Company Name :
Nature Of Business :
Designation :

KnowDis Data Science LLP
KnowDis Data Science LLP
Analytics and Consulting
Data Scientist

Tentative Job Location :
Delhi NCR

About the Role

At KnowDis you will move the world forward. Every day, we create innovative machine-learning solutions helping our clients across e-commerce, healthcare, and finance domains to solve their problems.

We are a group of highly curious professionals who are dedicated to discover and implement new Deep Learning Models. We work at the intersection of machine learning, statistical analysis, deep learning, natural language processing, and computer vision.

We bring out the best in each other. And together, we work towards the vision of using this expertise to help society and make the world a better place.

As a data scientist, you should be passionate about natural language processing, computer vision, statistical sampling and analytical methods. You will be creating machine learning models and retraining systems. To do this job successfully, you need exceptional skills in statistics and programming. You will be part of an agile unit and will be collaborating with engineers, data engineers, and fellow data scientists.

Job Responsibilities

- Description :

 - Design machine learning systems
 - Research and implement appropriate ML algorithms and tools
 - Develop machine learning applications according to requirements
 - Select appropriate datasets and data representation methods
 - Run machine learning tests and experiments
 - Perform statistical analysis and fine-tuning using test results
 - Train and retrain systems when necessary

Requirements for the Job

- Bachelor’s/Master’s/PhD in Computer Science, Mathematics, Statistics or equivalent field and must have a minimum of 2 years of overall experience
- Minimum 1 year of experience working as a Data Scientist in deploying ML at scale in production
- Experience in machine learning techniques (e.g. NLP, Computer Vision, BERT, LSTM etc..) and frameworks (e.g. TensorFlow, PyTorch, Scikit-learn, etc.)
- Working knowledge in deployment of Python systems (using Flask, Tensorflow Serving)
- Previous experience in following areas will be preferred:
 - Natural Language Processing(NLP) - Using LSTM and BERT; chatbots or dialogue systems, machine translation, comprehension of text, text summarization.
 - Computer Vision - Deep Neural Networks/CNNs for object detection and image classification, transfer learning pipeline and object detection/instance segmentation (Mask R-CNN, Yolo, SSD).
