**You Lead the Way. We've Got Your Back.**

At American Express, we know that with the right backing, people and businesses have the power to progress in incredible ways. Whether we're supporting our customers' financial confidence to move ahead, taking commerce to new heights, or encouraging people to explore the world, our colleagues are constantly redefining what's possible — and we're proud to back each other every step of the way. When you join #TeamAmex, you become part of a diverse community of over 60,000 colleagues, all with a common goal to deliver an exceptional customer experience every day.

American Express' heritage was built on service and has been sustained by innovation. Through our evolution from an express mail business in 1850, to one of the world's largest card issuers by purchasing volume and a digital innovator, we've never been afraid to explore new possibilities and embrace the changing marketplace.

From our high employee Satisfaction ratings to our many workplace awards, American Express is consistently recognized as a great place to work by people around the world. We offer talented individuals challenging work with purpose by embracing both innovation and tradition. As our company has grown and evolved, sometimes reinventing our business outright, we have never strayed from the customer-service ethos and values on which the company was built — trust, security, integrity, quality, good citizenship, respect and customer commitment.

#### About American Express Technology

Innovation is at the heart of everything we do. Every single day, our technologists enable our customers around the globe to achieve their goals. They craft and deliver American Express infrastructure and applications, one of world's largest payment network built using Cloud Native architecture, processing millions of payment transactions daily across the globe. They are core architects in crafting sophisticated payment systems implemented as distributed microservices on Cloud, support processing of more than 25000 messages per second, handling \$1.2 trillion of money in payments among FinTech partners using modern age technologies.

#### Join the Engineering teams and make an impact right away:

- Description :**
- Develop highly scalable and critical applications and platforms using modern Cloud Technologies and Programming Languages (e.g., Java, Golang, Python, JavaScript)
  - Function as core members of agile teams building products and solutions on a wide range of technology domains including Distributed Real-time Transaction Processing, Big Data and Analytics, AI/ML, omnichannel capabilities on native iOS, Android, Social Integration and Services/APIs
  - Work in collaboration with highly talented software engineers in day to day activities and helping in review of design, coding using modern age technical stacks
  - Be part of a culture of innovation and experimentation, constantly pursue and learn industry leading/innovative technologies and solutions, and always be ready to try new concepts without fear of failure

**We have the know-how, technology and global reach to make nearly any idea a reality. All that's missing is you! Do you have?**

- Passion for technology and strong desire to learn.
- Curious mind to explore new possibilities and act to them.
- Never settle attitude and continuously looking for improvements.
- Customer focus to think differently and deliver value to customers.
- Data driven nature to drive decisions and results based on data.

#### Educational Requirements

- The Candidate must earn bachelor's or master's degree in a technical discipline by June 2021.

#### Job Location

- Full Time Software Engineering opportunities are available in Bangalore (Karnataka) & Gurgaon (Haryana) in India.
