<table>
Company :	Tredence Analytics
Company Name :	Tredence Analytics
Nature Of Business :	Consulting
Designation :	Analyst
Tentative Job Location :	Bangalore
</table>

Roles & Responsibilities:

As an Analyst, you will learn The Tredence Way of innovation & delivery; collaborate & be part of the team that solves business problems that involves:

- **Design thinking within the Tredence ecosystem of customers & partners**
- **Brainstorming with clients, stakeholders and Tredence internal teams to define a business problem**
- **Translating the business problem into an analytical problem and then solving the analytical problem using combination of Technology, Mathematics and Domain knowledge.**
- **Testing your skills and measure the impact for customer value creation**
- **Applying fundamentals of agile, CI/CD delivery**
- **Learning to work & adopt/adapt to Tredence and client infrastructure and application security standards**

You can expect to:

- **Go through a rigorous 8-10 weeks of the Tredence "Full Stack Analyst Program (FSAP)" that will involve learning different technology and mathematical concepts. You will be required to <u>successfully complete</u> the program and the associated assignments to kick start your career at Tredence.**
- **Get trained, guided and mentored by Tredence Academy, a team of experts/coaches who will help you build a career in analytics on an ongoing basis**
- **Use a combination of Technology (70%), Math (20%) and domain knowledge (10%) to solve real world business problems**

Required skills & interest areas:

- **Insight development by analyzing large data**
- **Understanding the value in data management and passion to apply AI, ML & DL**
- **Understanding of unified data architectures & scalable data sets**
- **Data cleaning and processing**
- **Excellent communication skills**
- **Collaborative mindset to work with clients, ecosystem and internal teams**
- **Motivation to learn constantly**
- **Should be interested in learning Coding**
