Company :	MoneyTap
Company Name :	MoneyTap
Nature Of Business :	Fintech
Designation :	Software Engineer
Tentative Job Location :	Bangalore

MoneyTap is India's first app-based credit line. Offered in partnership with leading banks, it is not just a personal loan, not just a credit card, but a personal credit line. In simple words, MoneyTap is catering to the credit needs of middle-class customers in India. Present in 40+ cities, we are providing small-medium cash loans, quick credit on mobile, affordable interest rates and flexible EMIs. We are team of highly motivated individuals who are driven by a goal to provide data-driven, affordable and flexible app-based credit lines to a million middle-class Indians in the next 3 years.

Job Title	Software Engineer
Work Location	Bengaluru
Division/ Department	Engineer Department

What you'll be doing at MoneyTap

Description :

- Responsible for the development and maintenance of complex high performing backend systems that integrate with various service and data providers
- Data modeling to optimize for performance based on access paths
- Designing APIs and abstractions to expose to the web and app front-end
- Building servers and clients for data storage and querying
- Developing, designing and monitoring large-scale web and mobile applications
- Ensure the best possible reliability, correctness, performance, quality, and responsiveness of the application
- Help maintain code quality, organization, and automation.

Things that make you a good fit

- Minimum 6 months of professional experience.
- Bachelors or Masters degree in Engineering or Technology - any discipline
- Strong aptitude for server-side programming
- Experience with higher level programming languages like Java, Python, Golang
- Experience with relational databases like Postgres, MySQL, Oracle
- Familiarity with RESTful APIs to connect front-end applications to back-end service
- Knowledge of the open-source ecosystem, viz., frameworks and libraries available for common tasks
- A knack for benchmarking and optimization
- Proficient understanding of code version tools, such as Git
- Ability to work in a fast-paced startup
- Strong ability to write structured technical design outlines and pseudo code
