Company :	**CloudxLab**
Company Name :	**CloudxLab - Issimo Technology Pvt Ltd**
Nature Of Business :	
Designation :	**Software Engineer**
Tentative Job Location :	Bangalore

Description :

We are disrupting the way we learn technology. We are a small team of engineers and educators passionate about building innovative products to make learning fun, engaging and for life. We upskill engineers in deep tech - make them employable & future-ready. Our online gamified SaaS platform is being used by 100k+ users across the world including students from Harvard, MIT, CMU and the University of Washington.

Currently, we are working on these products.

1. **Gamified Learning Environment - Existing coding playgrounds are restrictive and do not give full access to the users, thereby limiting their ability to tinker with the code and the systems. Also, there are no feedback loop and yardstick to measure if we are learning correctly during the hands-on. We are solving this problem by providing the real-time gamified learning environment which nudges the user and provides real-time feedback at each learning step.**

2. **Knowledge Graph - Connecting the user to skills for learning or for the job. Stay tuned for this. We are launching this soon.**

What are we looking for?

Engineers with a passion for building products. If you think you can contribute end to end from web development to automation to system administration then we can work together. If you know a lot about 'software development' and have a thirst to learn a lot more then go ahead and apply right away!
